Benjamin Encz

Enthusiastic and highly motivated software developer and project manager. Loves elegant and qualitative solutions. Successful professional experience in designing and developing mobile applications and leading software development teams and projects. Empathetic and open communicator.

Key accomplishments

- Successfully developed several iOS applications and internal frameworks, individually and in teams.
- Lead a team of 4 software developers through several releases of a mobile enterprise application, drastically reducing the defects count of the product.
- Held a lecture in object oriented software development.
- Published an article for the technical book *OpenGL Insights*.
